

SEAMLESSLY CONNECTING AGRONOMISTS AND GROWERS.

Creating efficiencies through one central, standardized & transparent data platform that seamlessly connects agronomists and growers.

CONNECTING THE INDUSTRY

POWERED BY AGWORLD

VISUALIZE YOUR SEASON, COLLABORATE WITH YOUR GROWERS, MEASURE YOUR SUCCESS.

The future of farming is data-driven; Agworld helps both you and your growers unlock value from your data today - on the same platform. Data only becomes useful at the right time, in the right context for managing your client's risk and reward. Agworld's truly standardized database uniquely provides you the insights and reports when and where you need them, and either online or offline, because cell phone coverage is not a given!

With rapid digitization in agriculture, the importance of relationships and advisors are increasing. Agworld helps you strengthen relationships with your growers, create efficiencies, and provide better service while future-proofing your agronomy business.

Geospatial and precision data gets a lot of attention at the moment but is only a part of the bigger picture. Agworld includes the precision tools you need but focuses on business outcomes, not just pretty pictures that hold no value.

Collaborate with your clients and strengthen relationships

Collaborate with your growers and manage key information together on the same platform, from anywhere. Minimize administrative tasks and spend more time on client relationships.

Know your history and plan your future

Through knowing the exact history of each field, you are enabled to make better plans for your clients. Having a clear plan for each of your clients in Agworld helps you be more efficient during the season, and helps your clients make more profitable decisions.

Powerful reporting tools at your fingertips

Agworld's first-in-class reporting helps you create customized reports tailored to how you like to provide agronomy services to your clients. From basic season-planning reports to complete farm performance overviews, Agworld offers you every report you need.

“Being able to be consistent with our customers and being that trusted advisor to them, with a solid platform, helps us at the farm gate a lot.”

Matt Clark
Ag Data Manager, Ceres

Remain relevant to growers while increasing efficiencies.

Technology should help you with your daily activities and not form an additional burden. Scalability is key and Agworld helps you maintain control when overseeing a large acreage and complex growing operations. It scales your business capability through efficiency.

By creating accurate pre-season plans and budgets together with your growers, with as much or little detail as needed, you can ensure that they are on the same page as you all season long. Transparency is important and Agworld helps you increase your relevance to growers by providing them with all the information they need, in the best format possible at the right time.

Any digital solution stands or falls with the level of support offered. Agworld includes unlimited, world-class support with all its products.

Seamless collaboration to increase performance.

Agworld is built for the future and works with the largest agribusinesses in the world because it is built on a modern platform that continues to improve. Agworld is already building the next tools you will need for your digital future.

The Agworld platform offers you seamless integrations with soil laboratories. From sampling to creating variable rate prescription files that you can send directly to your growers or their applicators, you can do it all in Agworld.

If you are in California, you can send your Notice Of Intent and Pesticide Usage Reports reports straight from Agworld, with just one click of a button. Rate validation shows you exactly how much of a product can be used in a particular crop. No more manual reports and error-prone internet searches, Agworld helps you every step of the way.

Quickly plan & forecast a season

With Agworld’s comprehensive planning and budgeting tool, create professional plans and reports in minutes. By using Agworld’s copy-and-paste functionality of crop templates and field plans, creating a plan and budget is made simple.

In-field data collection

From creating records to recording geospatial observations and taking photographic evidence, everything can be recorded in Agworld without needing network access. Simply sync your device when you can and always be up-to-date with your data safely stored in the cloud.

Product information, anytime, anywhere

Agworld has product labels and SDSs available for all registered products and rate validation will show you min and max rates per product and crop combination. REI & PHI information is displayed on a map and accessible at all times.

Easy access to data

Record observations and recommendations for fields easily with Agworld’s smart record keeping solution. Automatically share data with your clients. No more wasting time trying to find data, it is accessible when and where you need it.

Measuring performance

Whatever you need to measure, Agworld offers you the opportunity to create a report for it. Whether it is nutritional, agronomic or financial performance; Agworld can show you a visual interpretation of how your performance is tracking vs what was planned.

Stay informed all season

Get insight into field performance throughout the season. Whether you need to see agronomic, financial or nutritional information, Agworld offers you the exact snapshot you need at any time.
